

## Join Ohio's Energy Future Tour!

Ohio's Energy Future Tour is a collaboration among businesses, trade associations, nonprofits and local governments, to provide an opportunity for citizens and consumers around the state to address the positive impact these technologies have had on the regional economy, such as reduced energy costs and job creation, and to showcase local facilities and activities on the cutting edge of energy innovation.

As Ohio enters the two-year freeze on renewable energy and energy efficiency standards, a legislative study committee will offer its recommendations and policymakers will determine the future of energy in Ohio. It is critically important that we focus a spotlight on the benefits of these programs for Ohio's families, businesses, and local communities. Through these regional dialogues, we can design an energy future for Ohio that reduces costs, creates jobs and propels our 21st century economy.

Ohio's Energy Future Tour will consist of a series of regional forums with invited speakers and presentations, public comments and questions, and visits to advanced energy sites and projects. Each forum will be unique and designed with input from community leaders to look at how to move Ohio's energy future forward on the interrelated issues of electricity costs, economic development, energy independence, public health and environmental protection.

At the end of the Tour, we will compile the comments from all of the events and develop a set of recommendations on the best course to enhance Ohio's energy future. This information will be shared with policymakers.

To join us on Ohio's Energy Future Tour,  
please contact: Jane Harf at [jaxharf@yahoo.com](mailto:jaxharf@yahoo.com) and 614-315-1125.

*Paving the way to a new energy vision*

**The first stop on the Tour will be Cleveland.**

We are inviting stakeholders from throughout Northeast Ohio to join us on December 15, 2014 from 5:00 - 7:30 pm at the Great Lakes Science Center.
